ROHDE & SCHWARZ

Make ideas real

WIDEST PRODUCT RANGE IN A SINGLE PROMOTION. UP TO 50 % SAVINGS ON MOST POPULAR CONFIGURATIONS.

Proven concept, extended range of product offers!

Rohde&Schwarz has transformed customers' expectations of a promotion in 2019 with the introduction of fully equipped, preconfigured bundles for a single price. A positive customer reaction to this offer convinced us to introduce a new promotion building on that success. It extends the winning principles of a single configuration to an even wider product range than before.

Now customers can benefit from up to 50 % off promotional offers across all the typical products present on an engineer's bench: from the oscilloscopes, signal & spectrum analyzers, power analyzer and power supplies to vector network analyzers, signal generators, cable & antenna analyzers and power meters. Several of the instruments are recent market introductions or have not been offered in this promotional configuration before.

Future-proof your investment!

Buying T&M equipment is a long-term investment. Some of the options available for purchase today might not be needed for a current T&M task, but could be required later. Securing a budget for updates can be time-consuming. What if you could just buy an instrument with everything you need now and might need in the future, for just a fraction of its regular price?

Leveraging customer feedback and its industry experience, Rohde&Schwarz has equipped its products to the fullest or compiled its most sought after configurations for this limited-time offer. Benefit from the following:

- Options included upfront at point of purchase
- No need to configure, it is taken care of for you
- Single price for each instrument
- Maximum bench performance and maximum savings
